The world-famous, historical city of Lucerne lies in Switzerland in the heart of Europe. Because of its central location right on Lake Lucerne, which is surrounded by grand mountains like Mount Titlis at 3000 meters high or the impressive Mount Pilatus, Lucerne is considered to be the "Switzerland in Switzerland". You will find everything here: the lake, the mountains, the city – a distinctive consonance of nature and work of man, which has been preserved and carefully developed for centuries. What do you want to see while in Lucerne? The Chapel Bridge with its gabled paintings of old battles and the adjacent quaint quarters with little streets ranging and changing from silence to abundant liveliness? The curiosities of the museums, the treasures of the many churches? Take a leisurely walk through a maze of small streets, bridges, promenades and plazas dominated by countless historical towers, fountains and frescoed buildings.

Starting from Bönigen, where you travel with your experienced guide across the River Lütchine, heading towards the north shore, exploring beautiful cliffs, the 12th century Ringgenberg castle and hidden beaches along the way. The 5-Seenweg (Five Lakes Hike) is in a class of its own among hikes in the Zermatt mountains. The views of the mountain lakes are superb (with the Matterhorn reflected in three of them), and the trail is full of variety. The path leads past the lakes of the Stellisee, Grindjisee, Grünsee, Moosjisee and Leisee. Each of these mountain lakes is very different in terms of shape, colour, character and size, and has its own special attraction. The Leisee is good for swimming: children love it. The Grünsee looks out over a rather more rugged landscape, where Swiss stone pines nevertheless manage to grow among the scree and sand. The shores of the Grindjisee are home to rare flowers. And so on – each one promises a unique experience.

Take the chance to experience the ultimate downhill action on Sunnegga for young and old alike: get together with friends or family for a race down into the valley on special off-road scooters. The thrilling descent is a fun-filled adventure for people of all ages. Helmets on and off you go for what must surely be the most enjoyable descent in Zermatt. Past the idyllic hamlet of Tuftern with its old wooden huts and on into the shade of the forest of Swiss pine and larch. After that the real descent begins, so be ready with your hand on the brake as you zig-zag down towards Zermatt, heading in the direction of the Matterhorn.

The traverse of the Gorge is about 1 km long and takes approx. 3-4 hours. The dynamic Fixed Rope Route leads you across the polished rock with the use of steel cables and devices, which are attached to the rock. The highlights of the traverse are three abseiling passages, three flying foxes (of which the longest is 80 meters), a pendulum swing and a Himalayan bridge, which gives you the ultimate surge of adrenalin. Throughout the entire adventure, you are secured constantly, and you will not be in contact with the water.
